Bottom Line Up Front

MBSE can be utilized to assess the Squad as a Systems of Systems Architecture, and as a collective Formation, to support capability portfolio assessments to enable Overmatch.

Agenda

- Overview
- MBSE Methodology & Tools
- The Squad as a System
 - Squad Requirements & Architecture
 - Integrated Modeling and Simulation
 - Decision Analysis
- Proof of concept results
- Conclusion
- Question & Answer

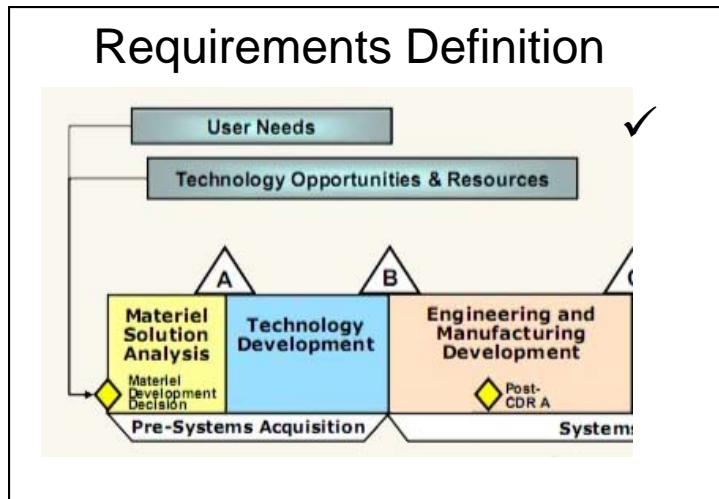

Squad SoS Perspective

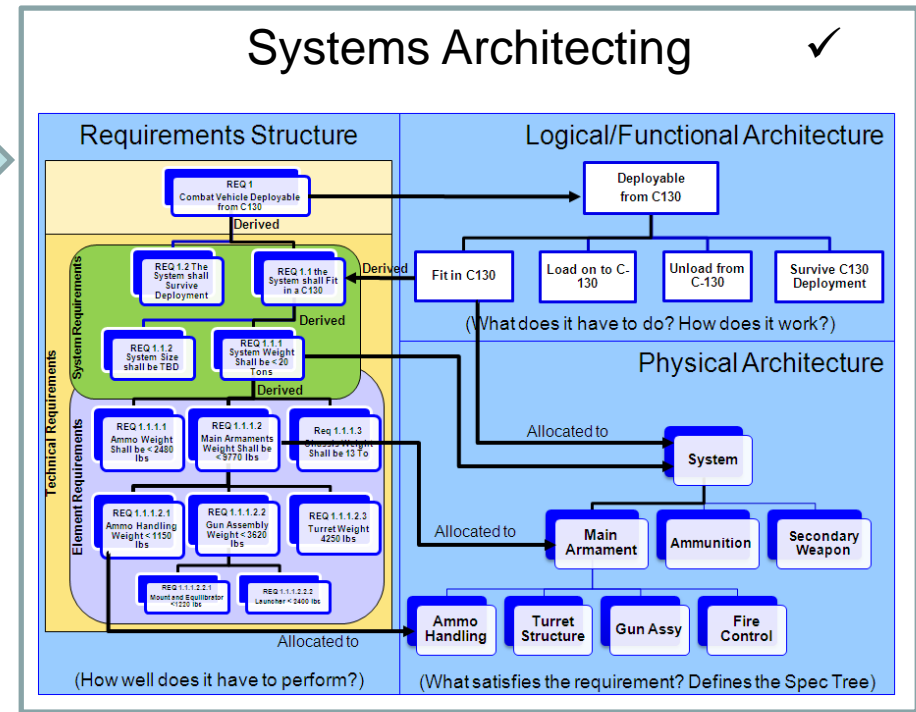

Squad SE Methodology that defines SoS Tradespace and Integrates DOTMLPF Solutions

- Use Model Based SE to model the Squad as a formation, a system of systems, rather than individual materiel & non-materiel solutions
- Apply Systems Engineering methodology & Model Based tools to assess and evaluate capability improvements to a Squad that will provide decision makers with increased insight into the effectiveness of their options

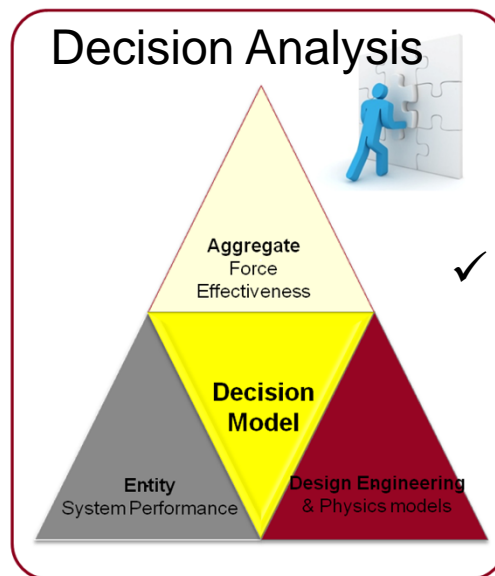

Requirements Definition

Systems Architecting

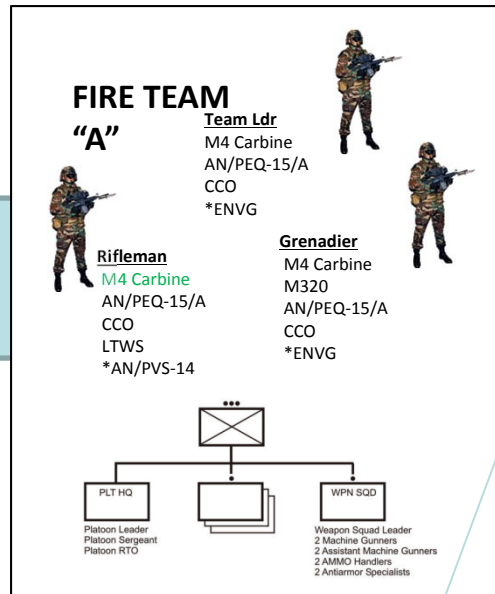

Decision Analysis

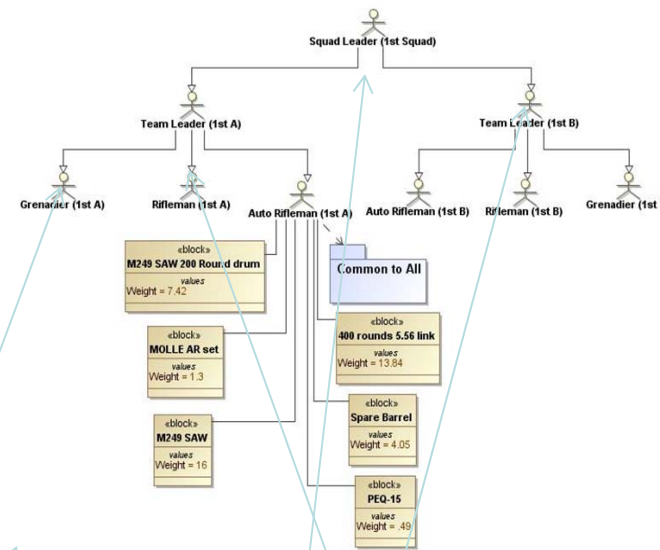

Mission/Requirements (TRADOC)

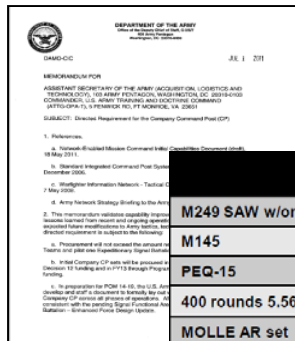

Soldier Architecture

Physical Architecture

Input to Analyses

Item	Weight
M249 SAW w/one 200 round drum	23.42
M145	1.51
PEQ-15	
400 rounds 5.56 link	
MOLLE AR set	1.3
Spare Barrel	4.05
Total	44.61
+ Common Equipment	140.72
+ Common + Cold Weather	147.34

Soldier Equipment

- Lethal/Non-Lethal
 - 40mm HE/DP
 - 40mm PARA
 - 40mm SMK
 - 40mm STAR
 - 5.56 Ammo Linked
 - Flashbang
 - M67 Grenade
- PPE
- Training Package
- Weapon Pckg
 - Relations
 - AN/PAS-13 (TWS II Tech insert) LW
 - M145 MGO
 - M249
 - M320

Leadership & Training

- Leadership Package
 - Relations
 - Advanced Leaders Course
 - Initial Entry Training (IMT/OSUT)
 - Ranger School
 - Small Unit Leader Course
 - Soldier Self Development (SSD) I
 - Soldier Self Development (SSD) II
 - Warrior Leaders Course
- Lethal/Non-Lethal
- PPE
- Training Package
 - Relations
 - ASAT
 - FORSOM/CENTCOM PD Checklist

Use Cases

**Operational Requirements
MFE/MOE/MOPs**

**Tradespace
Analysis**

- Communications
 - Ground Soldier System Inc I Nett Warrior
- Intelligence/Sensors
 - Enhanced Night Vision Goggles
 - FLIR Recon Bino B9-F0
 - Handheld Optical Augmentation (HOA)
 - Individual Gunshot Detection (IGD)
 - Sense Through the Wall (STTW) AN/PPS-26
- Speed/Maneuver
 - Soldier and Small Unit Power
 - Soldier Protection System (Plate Carrier)
 - Squad Multipurpose Equipment Transport (SMET)
- Weapons Systems
 - Weapon Mounted lasers/sensors
 - Family of Weapons Sights (FWS)
 - Grenadier Laser Range Finder
 - Squad Common Optic
 - STORM (AN/PSQ-23)
 - Thermal Weapons Sights ANPAS (V1,2,3)
 - Weapons / Munitions
 - Individual Assault Munitions (IAM)
 - Lethal Miniature Aerial Munition Systems (LMAMS)
 - M320 Grenade Launcher
 - M4 Carbine / Improvements
 - XM 25 Counter Defilade target Engagement

**Integrated DOTMLPF Decision Framework
...from Requirements to Concepts to Solutions**

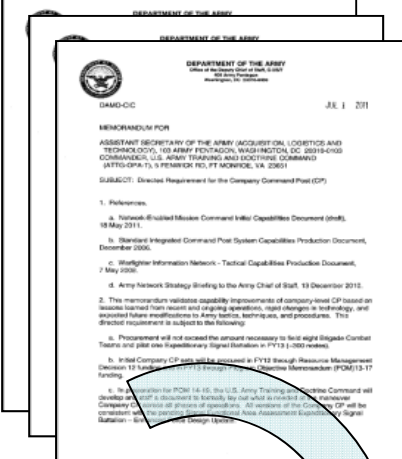

**Integrated M&S/Analysis Environment
Live, Virtual, & Constructive**

TECHNOLOGY DRIVEN. WARRIOR FOCUSED.

- Use Cases & IWARS Simulations
- Translate Use Cases (Narratives, Tasks, Graphics) into MBSE models
- Traceability to Requirements, MOEs, CONOPS
- Facilitate M&S development and execution

- Early Focus on Soldier-System Integration in the design life cycle
- “Soldier in the Loop” evaluations to augment M&S
- Provide human empirical data to better inform the SE process including requirements, design considerations, and Trade Studies

M4EX	36 - 40	81%	41	39.8	89%

TECHNOLOGY DRIVEN. WARFIGHTER FOCUSED.
Distribution Statement A

Decision support model captures and synthesizes outputs from individual analyses into trade-space visualizations designed to facilitate rapid and complete understanding of the trades available to stakeholders and provide drill down capability to supporting rationale.

Derived based on Decision Analysis Process, OSD Guidance, Requirements, M&S data

- 1- Baseline - M4 Unqualified
- 2- M4 Marksman
- 3- M4 Sharpshooter
- 4- M4 Expert
- 5- Equipment Transport
- 6- Soldier Protection Improver

- Stakeholders choose the Goals they Value. Current five, based on OSD guidance.

- Decision analysis results presented to Stakeholders and Decision Makers to make informed decision.

Stakeholders provide input in development of Criteria and Priority Weighting. SMEs responsible for development of assessment for each Criteria.

- The Squad can be viewed as a complex System of Systems, a cohesive formation of capabilities.
- Model Based SE can facilitate:
 - A defined architecture & trade space through a common baseline model
 - Assessment across Leadership, Training and Materiel opportunities to achieve Overmatch
 - Integrated system(s) data to conduct Portfolio and SE Trade Analysis
- Proof of concept demonstrated tradeoff analyses across Materiel, Training, Leadership (DOTMLPF) that takes into account stakeholder values, including performance, risk and cost

Framework enables SE Tradeoff Analysis, a key component of the OSD Directive for Better Buying Power.
